

**A Solution for Dangerous Indoor Spiders!**  
 We are excited to offer the effective and hot selling **Hobo & Indoor Spider Traps** designed to catch any indoor spider or pest, especially the dangerous Hobo & Brown Recluse Spiders which are prevalent in the Northwest United States and Southwest Canada (Hobo) and the southern half of the USA (Brown Recluse).

**Why use Big H Traps™ instead of Pesticides?**  
**Reason #1** -- Pesticides are **POISONOUS**. Sprays are dangerous not only to spiders, but also to pets and people. Our traps are just very sticky and naturally baited to attract Hobo, Brown Recluse, and other indoor spiders. Once stuck to the trap, the spiders cannot get off and die within a day or two.

**Reason #2** -- Spraying and bombs only kill things they come in direct contact with. Hobo and Brown Recluse spiders are more mobile than other spiders, so sprays won't kill the spiders that move to places the sprays didn't reach. This means pesticides could make room for the more dangerous spiders that were originally inside.

**Caution** -- Keep the traps out of the reach of children and pets. Because spiders may still be alive when stuck on traps, they may be able to bite things that come in contact with them. **Our traps can be folded to protect your children and pets following the folding instructions included with the traps.**

Dear Customer,

Thank you for your purchase of Big H Traps. We have had great success marketing our traps, and you are one of the reasons why.

We feel Big H Traps™ is a superior product specifically designed to control dangerous spiders like the Hobo and Brown Recluse spiders. We would like to get our products into local stores, but we need your help.

We aren't asking you to help for free. We will give you \$20 (either cash or a credit towards your next order--you decide) for every dealer you refer after the dealer buys a standard case of our product. You don't need to sell our product, just give the back of this page to your favorite local garden store or other type of store you feel would be interested. You may make copies and give it to as many stores as you like.

In addition to the \$20 you make, the retailer will receive **FREE SHIPPING** on the initial case they purchase.

**Here's all you do:**

1. Fill in the referrer's section of the form on the back of this page.
2. Make copies with your section already filled in.
3. Take copies to local merchants, preferably the manager or purchasing manager.
4. Ask them to call us and/or look at our web site [www.bigproducts.com](http://www.bigproducts.com) for information about our product.
5. You're done! The rest is up to them.
